

Recycle with Recovynyl

What is Recovynyl?

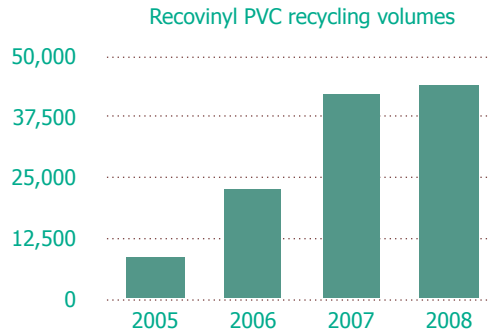

Recovynyl is a PVC recycling scheme, set up to encourage companies to recycle post-consumer PVC. The aim of the scheme is to increase the amount of PVC recycled by establishing sustainable collection and processing arrangements.

The scheme has established a UK network of PVC recyclers who can accept post-consumer PVC. The scheme provides incentive payments to its recyclers, who sort the material and log the volumes which are verified annually by independent audit.

Recovynyl is a European-wide initiative and is now established in 10 countries across the continent. Backed by the British Plastics Federation, it is funded by the PVC industry through its Vinyl 2010 initiative and led in the UK by Axion Consulting Ltd.

Recovynyl was set up to demonstrate that PVC has a sustainable future, bringing both economic and environmental benefits. Its goal is to remove the barriers to recycling by demonstrating that all forms of PVC collected from the construction and demolition sectors, can easily be recycled and re-used, again and again.

Since its launch in April 2005, Recovynyl has exceeded all expectations by recycling more than 117,000 tonnes of post-consumer PVC waste in the UK alone.

There are 31 accredited recycling companies signed up to the scheme. Access to PVC recycling facilities for window and building companies is now easier than ever.

Reasons to recycle your PVC waste

- Reduced disposal costs on landfilling waste
- Fewer skips saves money
- 'Green' credentials can help win new business
- Wider sources of plastic accepted – ideal for full refurbishment projects
- To meet PVC recycling targets
- Contributes to saving of finite resources

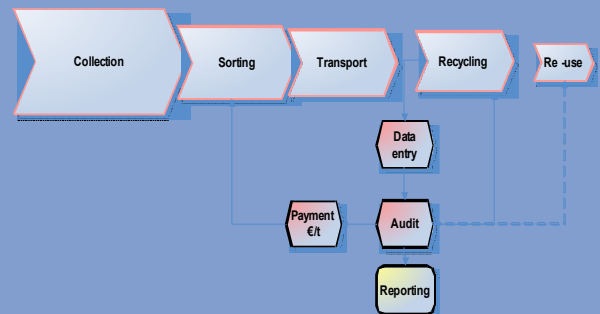

How Recovynyl Works

Businesses can collect post-us PVC from a variety of sources (windows, pipes, gutterings etc) and then arrange for a Recovynyl recycler to accept the waste. Companies can either contact any of the Recovynyl recyclers directly or contact Axion Consulting, Recovynyl's UK agent, for further information. You can find contact details of all Recovynyl accredited recyclers overleaf.

The scheme also offers technical support and access to accredited recycling companies throughout the UK to make the recycling process easier for participants, wherever their location.

Data on the amount of recycled PVC waste is logged every month on the Recovynyl website. Volumes of recycled PVC are verified by independent audit, each year.

Recovynyl can handle more than old PVC window frames. It encourages the collection of plastic from a variety of sources outside the window sector. Waste PVC such as irrigation water pipes in greenhouses, cooling tower packings, fascia boards, cladding, cable

ducting, flooring, roofing materials and shutters can all successfully be recycled.

Have a look at the Recovynyl website at: www.recovynyl.com

If you want to start recycling your post-consumer PVC, contact Jane or Matt on +44 161 355 7618 or contact any of the Recyclers listed overleaf.
